

Davies Allergen Policy

Allergen Policy

We are leaders in the area for top produce. We only handle vegetables in our manufacture, storage and distribution sites. We do not stock animal products (crustacean, molluscs, fish, eggs or dairy) or cereals (gluten) and therefore manage these allergens well with very low risk of issue. We are a tree nut and peanut free site with excellent training on handling and managing unexpected sources of these.

Due to our plant-based ingredients, there is a higher risk of certain allergens such as celery, lupin, mustard and soybeans.

Due to handling of raw materials, there may be some risk of cross-contamination of sesame, soybeans and sulphites.
